

DPS | DATA PUBLISHING SOLUTION

Your individual portal solution in Microsoft
Dynamics 365 Business Central

WORK TRANSPARENTLY - CALL UP INFORMATION AT ANY TIME

Fast access to information and documents around the clock and from any location is becoming increasingly important for companies and employees and is already a must for many.

Simova GmbH has now developed the right extension for your Microsoft Dynamics 365 Business Central application to eliminate these problems:
DPS for Business Central.

22% of companies in Germany use a cloud service.

Companies use cloud services mainly to store data.

ADVANTAGES FOR MANAGEMENT

Simova's DPS provides you with a cost-effective solution that allows you to and employees a limited, web-based Access to data and processes from business Central enable. What data is provided and are displayed, you define them.

With DPS, your data is not stored on a Web server, but are

- Cost-effective connection of customers, business partners and employees to selected data from Microsoft Dynamics Business Central
- Maximum security for your data
- Increased transparency and improved information exchange
- Fast return on investment

still in business. Central and are only accessed via a web portal. Thus DPS guarantees a maximum of Security for your data.

The user is shown exactly the data he needs. In this way a high user acceptance as well as a fast working can be guaranteed. Increase the transparency for your customers and business partners and optimize the exchange of information and the internal company communication. Simova's DPS significantly accelerates your business processes and guarantees you a rapid return on investment.

SYSTEM REQUIREMENTS

DPS for Microsoft Dynamics 365 Business Central, like many other extensions, is available as an extension to Microsoft AppSource.

The extension can be integrated into your Business Central application with just a few clicks.

An Internet browser is required for the successful use of DPS. There are no restrictions when choosing the Internet browser. DPS is compatible with all common browsers (Microsoft Internet Explorer, Safari, Google Chrome, Mozilla Firefox and Opera). Changes and adjustments (e.g. with regard to displayed data fields) are also made directly in Business Central and are then visible directly in the browser.

ADVANTAGES FOR EMPLOYEES

For many employees, it is becoming more and more important to be able to flexibly organise working forms and times. Home office as well as quick and efficient work on the move is only possible if you as an employee have access to all relevant business documents and processes. Simova's DPS offers the following for this purpose the right solution.

- More flexibility due to location- and time-independent Access to all relevant business data and processes
- Adaptable and expandable to individual requirements Requirements and tasks
- More efficient and productive collaboration through direct exchange and rapid availability of Information

Be it in the field, on a business trip or in the homeOffice - with DPS from Simova you as an employee have the possibility to access the most important business data at any time and around the globe.

Depending on the task at hand, access to the data you have defined can be individually adapted and extended. This allows you to find the information and documents you need even faster and tailor DPS to your needs.

With DPS from Simova, you can not only access data, but also enter data online from any location and thus always keep business information up to date. This gives your colleagues direct access to information even when you're away from the office.

ADVANTAGES FOR CUSTOMERS

The relationship with the customer is the basis for the success of every company. The more this conviction is anchored in a company, the more pronounced is the search for measures through which transparency and service for customers can be sustainably improved and customer satisfaction increased. Simova's DPS offers you various options for this.

- Increased transparency and better service through centrally provided customer information
- Orders can be viewed at any time
- Customers are constantly informed about current offers and updates
- Intuitive user interface

For example, provide your customers with the most important information about your products and solutions by making them available to them centrally. Let product availability be viewed conveniently and at any time.

With Simova's DPS, your customers can also query the status of current orders at any time, create new orders and print out order confirmations directly or save them as PDF files.

You can also use DPS as an information platform, about that will keep you up to date with the latest offers and updates for your products and solutions.

ADVANTAGES FOR BUSINESS PARTNERS

For a successful cooperation the constant exchange with business partners is essential. Simova's DPS offers you the opportunity to set up a new, convenient information and communication channel for your business partners.

With DPS you can give your business partners access to existing orders, account balances, contracts, invoices, cre-

- Increased transparency
- Availability of information also outside business hours
- Provision of various information materials (e.g. price lists, product brochures)
- Feedback of data and information in real time

dit notes, etc. and thus increase transparency for your partners.

At the same time, DPS makes the information you provide available around the clock, so that business partners can access the data they need outside business hours.

With DPS, your business partners can not only information, but also to store data in the Send real-time back to you (e.g. from weighing operations). In this way, you can shorten response times. and in addition to the service for your partners also the own Optimize processes.
