

EDS | ELECTRONIC DELIVERY SOLUTION

Your Business Central Extension for sending
electronic business documents

ELECTRONIC DISPATCH OF YOUR BUSINESS DOCUMENTS - FAST AND SAFE

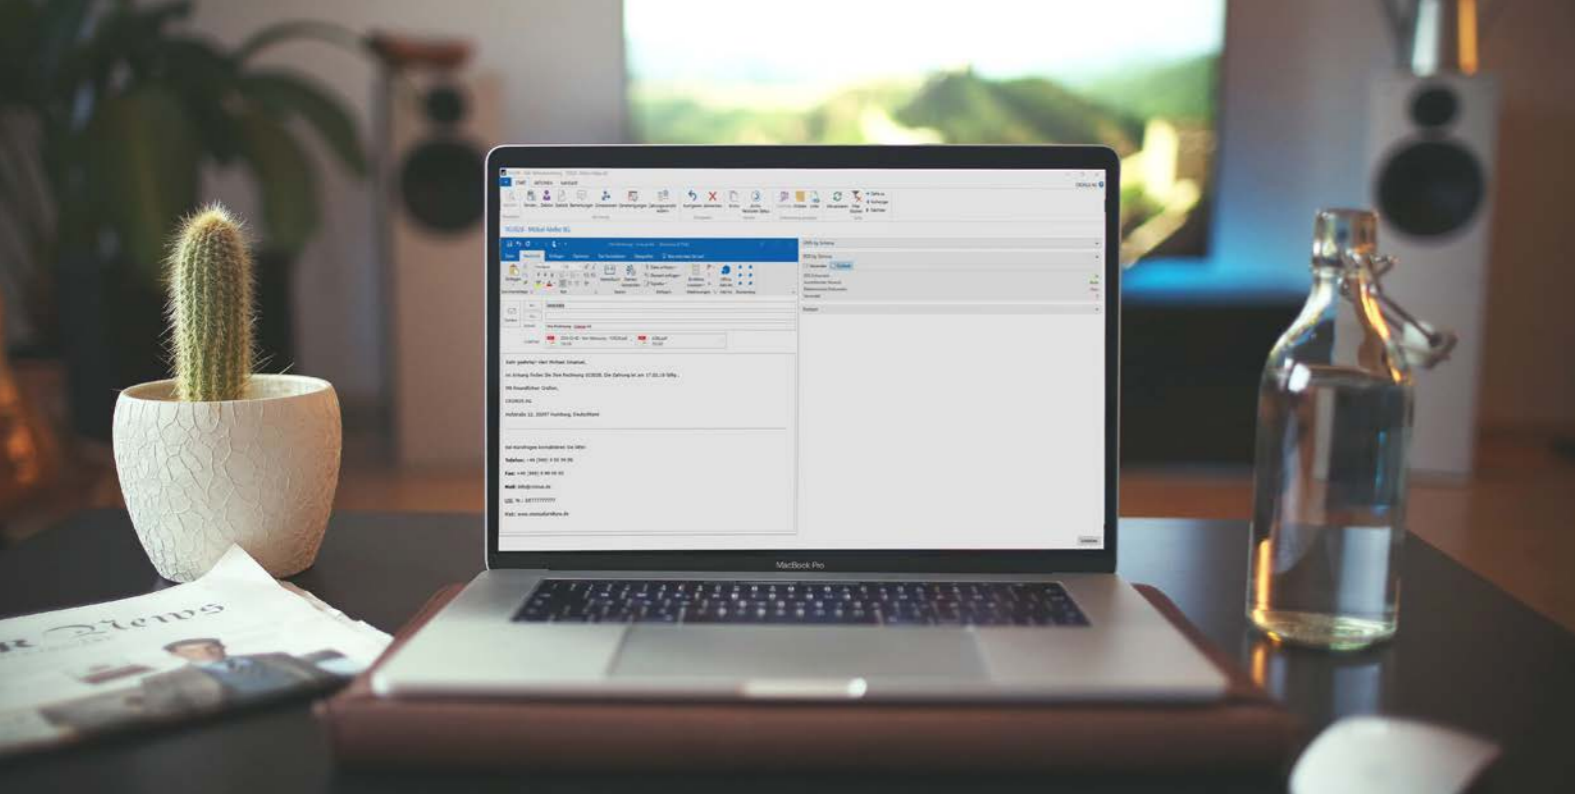

Every day, your company sends a large number of invoices and other business documents by traditional mail. Despite the fact that the Digitalization in many business areas, especially the dispatch of documents is still stuck in old structures.

Simova GmbH has now developed the right extension for your Microsoft Dynamics 365 Business Central application to eliminate these problems:
EDS for Business Central.

The annual decrease in letters in Germany is 2-3%.

Every day, around 66 million letters are sent in Germany.

ADVANTAGES FOR MANAGEMENT

The topic of digitisation has already found its way into your company at some point or other.

As a rule, only the dispatch of business documents is still handled today by traditional postal services. This

means high costs for postage and material in addition to the work involved.

Expenses and workload can be comfortably reduced by using the EDS module. Due to the Integration into your Business Central System significantly reduces time expenditure and minimizes costs. Without having to forgo personal contact with your customers.

You can flexibly choose between automated sending in the background or sending individually personalized e-mails. You can also define which documents are sent. For example, you can specify that the valid general terms and conditions are always attached to an offer.

- Significant cost savings by dispensing with postage and materials
- Acceleration of order processing through Automation of work steps
- Fast return on investment thanks to low implementation time
- No loss of personal customer contact thanks to personalised e-mails
- Uniform layout and professional appearance

SYSTEM REQUIREMENTS

EDS for Microsoft Dynamics 365 Business Central can be downloaded as an extension to Microsoft AppSource, like many other extensions.

The extension can be integrated into your Business Central application with just a few clicks.

The prerequisite for the successful use of EDS is an e-mail server which is used for sending the message. E-mails can be viewed in advance in an e-mail program such as Outlook.

ADVANTAGES FOR EMPLOYEES

The provision and dispatch of business documents such as invoices, order confirmations or payment reminders is part of your daily work.

The daily tasks in particular are often time-consuming and prevent you from performing larger tasks.

Unlike many other business processes, the sending of business documents has often not yet been digitized. Time to change that.

Simova's Add-On Electronic Delivery Solution (EDS) is a compact module for Business Central Systems that enables the electronic delivery of business documents. Your customers receive relevant documents in PDF format by e-mail.

You can dynamically define whether the documents are sent automatically, via a multi-user queue or in a personalized e-mail. Create a familiar interface with design templates. Define the dispatch recipient specifically, so that your contact only receives the documents relevant to him.

If you are also using the Simova document management system, you have the option, Attachments directly from your archive system to your email to attach.

- Fast dispatch of business-relevant documents
- Individual adaptation of recipient information - your contact receives the data he needs
- Increased transparency through possible integration into the document management system (DMS)

ADVANTAGES FOR CUSTOMERS

A company's relationship with its customers is one of the most important pillars of its success. The individual response to the specific requirements of each customer noticeably increases satisfaction and competitiveness and thus lays an important foundation for success.

With Simova's EDS module, you can quickly and efficiently provide your customers with exactly the documents they need for their work area. EDS makes business documents available electronically is dispatched. At the same time you remain completely flexible in the optical and content design of e-mails to your customers. For example, you can use the design templates of your business partner and thus create a familiar interface.

- Fast processing of customer enquiries
- Any extension of documents to be made available
- Increased transparency due to integration into the document management system
- Individual design

The focus on customer benefit in the individual selection of the documents sent creates trust and makes the customer's work easier. This creates a Customer loyalty from which both sides benefit.
